H. No. 34, 3rd Floor, Pocket 8
Sector 21, Rohini, Delhi - 110086

EDUCATION

2010 - 2023

Bal Bharati Public School
Pitampura

X Class - 93%

XII Science - 96%

2024 - CURRENT

Maharaja Agrasen Institute of
Technology

B - Tech in Computer Science

CGPA - 9.1/10 (till 5th Semester)

SKILLS

Languages - Python, C++,
Java, SQL

Web Tech - HTML, CSS, Streamlit

AI/ML - Scikit-learn,
HuggingFace, NLP,
Computer Vision

Tools - Git, MySQL, Excel,
Corel Draw

LANGUAGES

Hindi (Native)

English (Fluent)

French (Intermediate)

ARNAV JAIN

B - TECH STUDENT

PROFILE

Third-year B.Tech Computer Science student with strong foundations in software development, data structures, and machine learning. Skilled in Python, C++, Java, and AI/ML technologies with hands-on experience building real-world projects in NLP, fraud detection, MLOps, and automation. Passionate about solving practical problems through technology and seeking internship opportunities to apply and expand technical expertise in software engineering and artificial intelligence.

PROJECTS

AI Resume Builder

Tech: Python, OpenAI API, Streamlit

- Developed an AI-powered resume builder that generates personalized "About Me" sections using LLM-based text generation.
- Implemented dynamic content generation and user-friendly workflow for resume customization.
- Integrated API-based AI responses for real-time resume enhancement.

NLP Dashboard – Text Summarization & Sentiment Analysis

Tech: Python, Streamlit, HuggingFace Transformers, NLTK

- Built an NLP web application for extractive and abstractive text summarization.
- Integrated sentiment analysis using VADER and DistilBERT models.
- Added live URL scraping and real-time text processing features.

Fraud Detection & Transaction Analysis System

Tech: Python, Kafka, Machine Learning, Streamlit

- Developed a fraud detection pipeline for analyzing suspicious transaction patterns.
- Implemented real-time data streaming and anomaly detection workflows.
- Visualized fraud insights and transaction analytics through interactive dashboards.

MLOps Platform

Tech: Python, Docker, MLflow, FastAPI

- Built an end-to-end MLOps platform for model training, tracking, and deployment.
- Integrated MLflow for experiment management and performance monitoring.
- Containerized services using Docker for scalable deployment workflows.

Heart Disease Prediction & Model Comparison

Tech: Python, scikit-learn, pandas, NumPy

- Developed a machine learning pipeline to predict heart disease using supervised learning models.
- Compared Logistic Regression, Random Forest, and SVM classifiers for performance evaluation.
- Achieved highest accuracy using Random Forest with optimized preprocessing techniques.

CERTIFICATES

- Workshop on Basics of AI/ML
- Acquiring Data by Accenture
- Training and Internship Letter by LearnNex in the Domain of AI
- AI Security and Governance by Securiti
